Simply insert your driver's card into the reader, and click 'Download Card'. Data is then read and stored in tamper-proof files that conform to the UK and European standards as required by VOSA. These data files can be saved on the PC itself or to your network. Once your data is downloaded, you can view and print flexible reports of the downloaded data, including detailed activities and daily summaries. Vehicle unit (VU) data can also be downloaded from appropriate download devices.
